Classification layer accuracy and area report

Sample size: 256 px Area size: 256 square

Adjusted confusion matrix counts: predicted (rows) vs. observed (columns)

| | (1) | (2) |
|-------------------------------|-----|-----|
| mine [Red] 127 points (1) | 70 | 53 |
| no mine [Blue] 129 points (2) | 57 | 76 |

Adjusted confusion matrix area proportions: predicted (rows) vs. observed (columns)

| | (1) | (2) |
|---------------------------|--------|--------|
| mine [Red] 127 points | 0.2734 | 0.207 |
| no mine [Blue] 129 points | 0.2227 | 0.2969 |

Overall accuracies

| | Estimate | 95 % confidence interval | | |
|------------------|----------|--------------------------|--------|--|
| Overall accuracy | 0.5703 | 0.5703 | 0.5703 | |

Class-wise accuracies

| | User's accuracy | 95 % confidence interval | | Producer's accuracy | 95 % confidence interval | | F1-score | 95 % confiden | |
|---------------------------|-----------------|--------------------------|--------|---------------------|--------------------------|--------|----------|---------------|---|
| mine [Red] 127 points | 0.5691 | 0.5691 | 0.5691 | 0.5512 | 0.5512 | 0.5512 | 0.56 | 0.56 | (|
| no mine [Blue] 129 points | 0.5714 | 0.5714 | 0.5714 | 0.5891 | 0.5891 | 0.5891 | 0.5802 | 0.5802 | (|

Class-wise proportion and area estimates

| | Proportion | 95 % confidence interval | | Area [square] | 95 % confidence interval | |
|---------------------------|------------|--------------------------|--------|---------------|--------------------------|-----|
| mine [Red] 127 points | 0.4961 | 0.4961 | 0.4961 | 127 | 127 | 127 |
| no mine [Blue] 129 points | 0.5039 | 0.5039 | 0.5039 | 129 | 129 | 129 |

Implementation is based on: Stehman, S. V., 2014. Estimating area and map accuracy for stratified random sampling when the strata are different from the map classes. Int. J. Remote Sens. 35, 4923-4939, https://doi.org/10.1080/01431161.2014.930207
